

K-PLUS ENGINEERING

PHASE I  
ENVIRONMENTAL SITE ASSESSMENT

**WiKUS SAW TECHNOLOGY, CORP.**  
**1.12 ACRE PRODUCTION WAREHOUSE FACILITY**

**700 W BELDEN AVE,  
ADDISON, IL 60101**

**December 27, 2012**

## **EXECUTIVE SUMMARY**

K-Plus Engineering, LLC has completed a Phase I Environmental Site Assessment (ESA) of the WiKUS Saw Technology, Corp. located at 700 W Belden Avenue, Addison IL 60101. Our site reconnaissance and review of available data revealed the following evaluation of the Subject Property:

**Visual Reconnaissance** –At the time of our site reconnaissance, the Subject Property consisted of approximately 1.12 acres and was developed with one-story building encompassing 21,098 square feet. The Subject Property appeared to be in good condition, no evidence of significant spills and staining were noted on the facility.

**Historical Information** – The production / warehouse facility located on the Subject Property was constructed in 2001. Review of historic aerial photographs suggests that light industrial activities and equipment storage were present on the site since at least 1971 through 1988. The 1993 and 1998 aerials depict prior structures on the Property. Structures associated with the 1990s operations were demolished prior to the current facility's construction.

**Database Information** – The Subject Property was identified on the ERNS environmental database for the dumping of oil into a sewer drain in 2002. Although it is generally poor disposal practice to dump any hazardous materials into the sewer system, the waste materials would have flowed directly into the system and not remained on the Subject Property.

**Evaluation** – K-Plus Engineering has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM 1527-05 for the Subject Property at 700 W. Belden Ave, Addison, IL. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Subject Property.

Details of our evaluation and recommendations are discussed in the following sections and in the Appendix of this report.

## **1.0 INTRODUCTION**

K-Plus Engineering LLC (K-Plus) was retained on Friday, December 14, 2012 by WiKUS Saw Technology, Corp. (Client) to conduct a Phase I Environmental Site Assessment (ESA) of the WiKUS Saw Technology, Corp. site located at 700 W Belden Ave, Addison, IL (Subject Property).

### **1.1 Purpose**

This Phase I ESA was completed in order to provide an objective, independent, professional opinion of the possible presence of Recognized Environmental Conditions (RECs) or other possible environmental concerns (if any) associated with the Subject Property as part of environmental due diligence.

As defined in ASTM E 1527-05, the term *Recognized Environmental Condition* means "...the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property." In addition, the term *Historical Recognized Environmental Condition* means "... an environmental condition which in the past would have been an REC, but which may or may not be considered a REC currently." Performance of the Phase I ESA was intended to reduce, but not eliminate, uncertainty regarding the existence of Recognized Environmental Conditions in connection with the Subject Property.

The objective of this assessment is to perform a due-diligence and all appropriate inquiry regarding the environmental condition of, and assess potential liability for, any contamination on the site in order to satisfy Landowner Liability Protections (LLPs) requirements.

### **1.2 Scope of Services**

The Phase I ESA was conducted in general conformance with the ASTM Designation: E 1527-05, *Standard Practice for Environmental Site Assessments Process*.

The scope of work for this Phase I ESA was structured to offer a phased, systematic approach to evaluating site conditions. It included inquiry by and/or under the direct supervision of an Environmental Professional (as defined in ASTM Standard Practice E1527-05) and it included the following tasks consistent with the AAI Rule, the revised ASTM Standard, and Illinois Phase I requirements:

- A review of reasonably ascertainable and practically reviewable standard and supplemental record sources associated with the Subject Property and adjoining properties including, but not limited to: historical resources (e.g. aerial photographs, topographic maps, fire insurance maps, geographical and geological maps, and city directories,). environmental databases (i.e. lists of known sites of contamination and regulated facilities), governmental records (e.g.

Federal and State files, building department records, and local fire department records) and prior environmental and geotechnical reports (if provided):

- An inspection of the Subject Property and any improvements as well as visual observations of adjacent properties, and other sites and/or facilities in the vicinity of the Subject Property.
- Formal interviews with present and past (if any) owners, operators, and occupants of the Subject Property (as identified by the Client and/or record sources) and local government officials; and
- Evaluation of the information gathered and preparation of a written report that includes all supporting documentation and details all findings, conclusions, opinions, and any recommendations.

Additionally, as is deemed pertinent, the scope of work was expanded to include potential environmental concerns, such as the existence of asbestos-containing materials that are not required pursuant to the ASTM standards.

### **1.3 Significant Assumptions**

No significant assumptions were made during the course of this Phase I ESA.

### **1.4 Limitations and Exceptions**

K-Plus Engineering LLC performed the Phase I ESA using the degree of care and skill ordinarily exercised under similar circumstances by reputable environmental consultants practicing in this or other localities. No other warranty is expressed or implied. Information presented in the Phase I ESA is deemed reliable; however, there cannot be a guarantee that all potential environmental conditions have been located or identified. The conditions observed and evaluated during the site inspection are representative of the date(s) stated. Materials and conditions that are concealed or are inaccessible may not be discovered.

The lack of visible evidence of potential USTs and/or the fact that individual and agencies identified in this report may not be aware of, or do not have records of, the current presence of USTs does not preclude the possibility that USTs could be present at the Subject Property. Visible evidence of USTs, such as fill ports or vent pipes may have been obscured from view, and USTs could have been used at the Subject Property without the knowledge of the current owner/operator, site contact, or government agencies.

The findings, conclusions, and opinions expressed herein are based on reasonably ascertainable and practically reviewable information disclosed through interviews and publicly available records at the time of the Phase I ESA. The statements contained herein, on which our observations, opinions, and conclusions were based, are deemed factual. The reported analyses, opinions, observations, and conclusions are unbiased, professional, and limited only by the reported

assumptions, qualifications, and conditions stated herein. All information in this report is from sources deemed to be reliable; however, no representation or warranty is made as to the accuracy thereof. K-Plus cannot be responsible for the quality and content of information obtained from the external sources consulted or for conditions that are concealed, not fully disclosed, or not available at the time of the Phase I ESA.

## **1.5 Special Terms and Conditions**

The Phase I ESA was completed in accordance with terms and conditions provided by the Client.

## **1.6 User Reliance**

This assessment has been performed in conformance with all applicable legal requirements and accepted practices prevailing in the environmental assessment and asbestos consulting industries, including the U.S. Environmental Protection Agency's final "All Appropriate Inquiry" Rule (70 Fed. Reg. 66070) ("AAI Rule"), the 2005 update of the American Society for Testing and Materials (ASTM) Standard Practice for Phase I Environmental Site Assessments (E 1527-05) and the requirements of 415 ILCS 22.2(j)(6)(E), the "Illinois Phase I". The standard of care employed during this investigation should be sufficient to meet the definition of an "innocent landowner" under current environmental laws. If this Phase I ESA report is more than 180 days old, certain sections must be updated in order to maintain qualification for LLPs afforded under CERCLA.

The K-Plus Engineering professional(s) that prepared this assessment meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and they have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property.

K-Plus Engineering LLC, its officers, and its employees have no present or contemplated interest in the property or the parties involved. Our employment and compensation for preparing this report are not contingent upon any action or event resulting from the analyses, opinions, observations, or conclusions, in or from the use of, this report.

This report is confidential and has been prepared specifically for the use by our Client. No third party may use the information in this report without obtaining the permission of both K-Plus and the clients, for whom this report was prepared. In no event may this report be used in whole or in part in any public offering or security without the prior written consent of K-Plus. No abridgment, abstracting, or excerpting of this report may be made for any purpose whatsoever without obtaining the permission of K-Plus.

More information regarding the methods used by K-Plus Engineering LLC in creating this Environmental Assessment can be found in Appendix 1- Phase I ESA Contents.

## 2.0 SUBJECT PROPERTY

The site reconnaissance was conducted on Monday, December 17, 2012 by Mr. Kashif Bazal, Environmental Inspector for K-Plus. Mr. Bazal was accompanied during the site inspection by Ms. Kellie Grengs, Operations Manager of the facility for WiKUS Saw Technology, Corp. The weather conditions at the time of the visit were sunny with an approximate temperature of 50 °F. As a tool in preparing this report and documenting the conditions encountered at the Subject Property, various photographs of the Subject Property, surrounding land use, and other relevant features were taken. Copies of these and all other supporting documents that were relied upon during this project have been included as appendices in this report.

### 2.1 Site Location

The property is located at 700 W. Belden Avenue, Addison, Illinois, in central DuPage County, approximately half way between Veterans Memorial Tollway (355 S) and Kingery Highway (Route 83) (Figure 1).

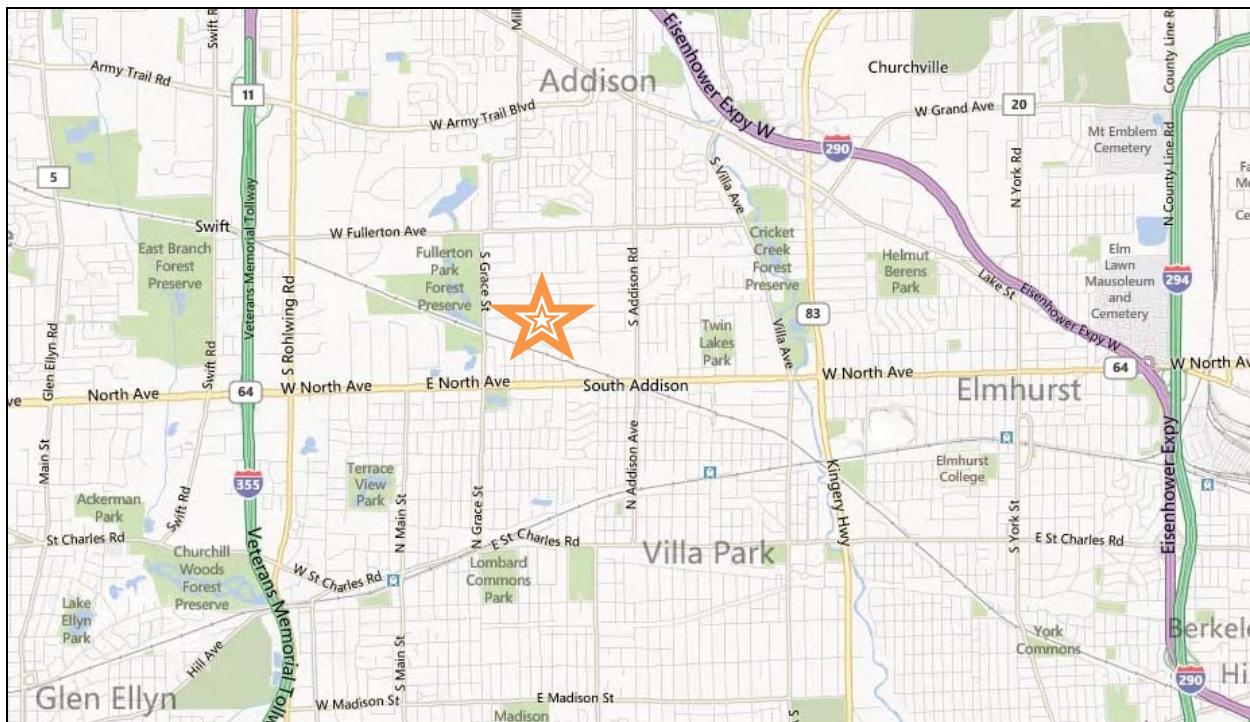

Figure 1 – Site Location Map

### 2.2 PIN & Legal Description

No PIN or legal description was provided for this property.

## **2.3 Site Features**

The Property is an office and processing facility located at 700 W Belden Ave in the Village of Addison, Illinois. The Property is developed with a square-shaped office/warehouse building, drives, and parking areas with a total approximate property area of 1.12 acres. The building on the subject property was completed in 2001 and contains approximately 21,098 square feet.

Employee parking is located along the west and north portion of the building adjacent to the warehouse area. Access drives to West Belden Avenue are located along the south property boundary. Generally the subject property is level with a slight slope to the northwest. Site landscaping is present on the south portion of the property and consists of mowed grass, decorative shrubs and trees.

## **2.4 Current Uses**

At the time of the site reconnaissance the property consisted of interior production area contained conveyors and welding equipment for metal belts. According to Property management the 3-inch metal strips are welded in series to long coiled strips and shipped to customers. The warehouse portion consists of storage racks for storing supplies and parts. The Property is currently owned by DHS Partnership. WiKUS Saw Technology is presently leasing the Property from DHS Partnership.

## **2.5 Past Uses**

According to historical research, the Subject Property was originally developed with the current building in 2001. Review of historic aerial photographs suggests that light industrial activities and equipment storage on the site since the 1970s. Historical information gathered during this investigation indicates that the Property was originally farmland and has been utilized for industrial purposes since the 1970s. Based on historical research, a prior building at the Property was constructed in 1988. Structures associated with this operation were demolished prior to the current facility's construction.

## **2.6 Surrounding Area**

The Subject Property is located in a mixed-use light industrial area. Adjacent properties include Regal Manufacturing and American Engraving to the east, CDS Office Technologies parking lot followed by vacant land to the north, Billco Corporation to the west and Better Bilt Productions to the south (Figure 2).

**Figure 2 – Site and Surrounding Area (Aerial 2010)**

## 2.7 Topography

The Property is located in Addison, DuPage County, Illinois. Review of the USGS topographic map indicates the property is located at an approximate elevation of 703 feet above mean sea level. The topography is generally flat, with grassy areas sloped so storm water drains away from the facility building (Figure 3).

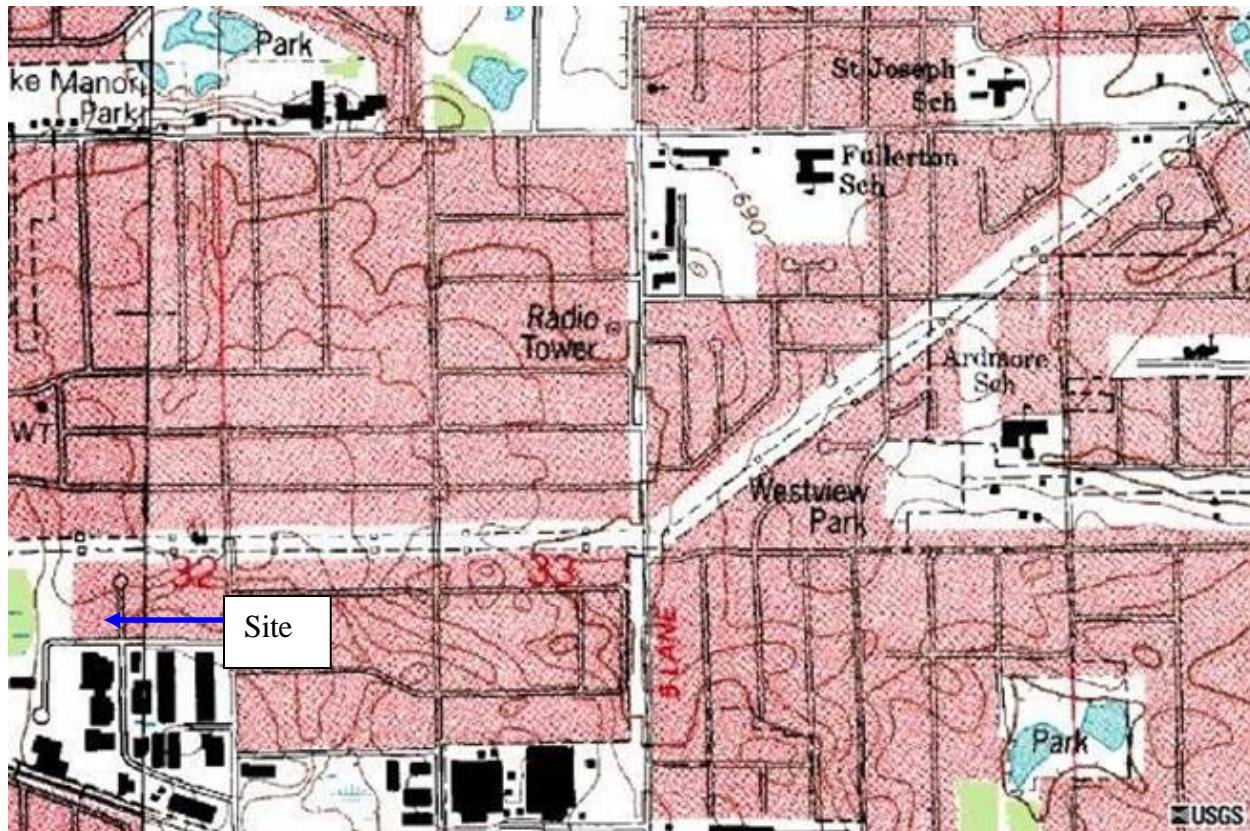

Figure 3 – Topographic Map

## 2.8 Area Geology

In order to categorize and assess the geologic conditions encountered at the Subject Property, K-Plus consulted the EDR GEOCHECK analysis of the physical setting of the Subject Property. The Subject Property is underlain by the Orthents, clayed, undulating soil. The principal soil type identified on the Subject Property is the Udorthents loam, a soil which well drained and of medium or fine texture, usually shallow to bedrock and lacking evidence of horizonation; occurs mostly on strong slopes.

### **3.0 PRIOR REPORT**

No prior environmental report was provided by the Client, the Owner, or the Site Contact; therefore, no evaluation of prior environmental reports was completed as part of this evaluation.

## **4.0 OBSERVATIONS AND FINDINGS**

The findings presented herein are based on all appropriate inquiry into current practices and previous ownership, uses and operations regarding the Subject Property consistent with good commercial and prudent engineering practices. The information obtained through the research and the site inspection is presented in the following sections. As appropriate, photographs and figures have been included for reference.

### **4.1 Prior Use History**

Historical information gathered during this investigation indicates that the Property was originally farmland and has been utilized for industrial purposes since the 1970s. Based on historical research, the current building at the Property was constructed in 2001.

K-Plus reviewed aerial photographs dated 1939, 1952, 1962, 1971, 1978, 1983, 1988, 1993, 1998, 1999, 2005, 2006 and 2007. The 1939, 1952 and 1962 aerial photograph depicts the Property as undeveloped and the surrounding area in agricultural land. The 1971 depicts the Property as an undeveloped lot surrounded by developed commercial buildings to the north, east and south of the Property. The 1978 aerial photograph depicts the Property as a developed parking lot for the adjacent commercial building to the east. The 1983 photo depicts the Property being used for storage of equipment for the adjacent building to the east. The 1988 photo depicts the Property as developed with commercial structures. The 1993 photo depicts development to the west of the property. The 1998 and 1999 aerial photograph shows little change in the structures on the Property relative to earlier photos. The 2005, 2006 and 2007 aerial depict the present structure at the Property.

K-Plus also reviewed a topographic map for the year 2002, which shows the Subject Property to be relatively flat, with grassy areas sloped so storm water drains away from the facility building.

K-Plus conducted a search of Sanborn Fire Insurance Maps through EDR. No Sanborn records are available for the Subject Property.

K-Plus submitted Freedom of Information Act (FOIA) requests local agencies concerning any historical information regarding the Subject Property. As of the date of this report, responses have not been received.

Based on this historical research it does not appear that prior use of the Subject Property has resulted in any environmental issues at the site.

### **4.2 Facility Operations**

In order to identify existing RECs associated with the Subject Property, K-Plus conducted a thorough on-site inspection. The Property is currently owned by DHS Partnership. WiKUS Saw

Technology is presently leasing the Property from DHS Partnership. Information provided by Ms. Kellie Grengs, Property Operations Manager for WiKUS Saw Technology, indicated: 1) buildings and systems which are the responsibility of the tenant are well-maintained and in generally good condition; and, 2) a diligent preventive maintenance plan is in place.

The interior production area contained conveyors and welding equipment for metal belts. According to Property management the 3-inch metal strips are welded in series to long coiled strips and shipped to customers. The warehouse portion consists of storage racks for storing supplies and parts.

Surface water on the Property drains overland to drop inlets located about the Property or percolates into the exposed soils. Site inlets connect to a dry retention area located at the northeast end of the Property and/or the municipal drainage system. No unusual staining was noted on the property during the inspection.

K-Plus did not observe any improper hazardous material usage or storage at the site. Additionally, K-Plus did not observe any pits, ponds or lagoons, stressed vegetation, noxious odors or other indications of improper use, storage and/or disposal of hazardous substances on the Subject Property.

### **4.3 Storage Tank Search**

Efforts were made to determine the presence of any tanks used to store regulated substances at the Subject Property or at neighboring properties. Visual observations from the inspection were supported by checking state and local resources for information regarding tanks. During the investigation of the Subject Property, K-Plus did not observe any indications (i.e. vent pipes, fill pipes, unidentified pipes, etc.) of USTs or ASTs at the Subject Property.

K-Plus submitted a FOIA request to the Village of Addison concerning any historical information regarding storage tanks and hazardous material usage at the Subject Property. A response has not yet been received from the Village. Additionally, K-Plus reviewed the Office of the Illinois State Fire Marshal (OSFM) database of registered USTs and the Illinois Environmental Protection Agency (IEPA) database of leaking UST (LUST) sites. The Subject Property is not identified on the UST or LUST databases.

### **4.4 PCB Equipment Identification**

The K-Plus inspector attempted to locate and identify all transformers or capacitors and, if present, to determine the age and owner of this equipment as well as its condition. During the inspection, K-Plus observed three pole-mounted transformers located just off the northeast corner of the Subject Property. During the inspection of the transformers, the inspector noted that they appeared to be in good operating condition with no signs of leaking or staining evident on the units or ground surrounding the units. Finally, the units were not marked with any black and yellow PCB warning

stickers. A warning sticker is required by federal regulations for equipment containing between 50 and 500ppm PCBs or greater. ComEd, as the owner of the transformers, is responsible for keeping the equipment in compliance with federal, state, and local regulations and the cleanup of contamination resulting from leaking equipment, as necessary.

## **4.5 Environmental Database Evaluation Area**

During this evaluation, K-Plus utilized Environmental Data Resources to conduct a standard environmental record search in accordance with the ASTM standards. The specific databases consulted, the publication dates, and the search results are included in a database report included as Appendix 6.

The EDR database report identified the following sites within the standard ASTM search radius: one; one (1) CERC-NFRAP listing; one (1) RCRA CORRACTS listing; fourteen (14) RCRA-SQG listing; one (1) ERNS listing; twenty-five (25) LUST listing; eight (8) UST listing; one (1) ENG CONTROLS listing; two (2) INST CONTROLS listing; three (3) SRP listing; eight (8) RCRA-NonGen listing; and one (1) FUDS listing. The EDR database also identified eighteen sites that were orphaned sites. A reasonable attempt was made by K-Plus to locate the orphaned sites to ensure that they were not an adjoining or nearby property. The results indicated that these orphaned sites are not in close proximity to the Subject Property and are therefore, not a concern.

### **4.5.1 Subject Property**

The Subject Property is listed on the Emergency Response Notification System (ERNS) database for a reporting of emergency releases to the soil. According to the database, an observer noted that oil was being dumped down the sewer drain in back of the property in March 2002. No further action appears to be taken regarding this incident. Although it is generally poor disposal practice to dump any hazardous materials into the sewer system, the waste materials would have flowed directly into the system and not remained on the Subject Property. No further incidents were noted in the ERNS database, and no evidence of other dumping or poor handling/disposal practices were noted during the site inspection.

### **4.5.2 Adjacent Properties**

As part of this Phase I ESA, K-Plus conducted a limited drive-by investigation of the adjacent and nearby properties. A review of the environmental databases indicates that the adjacent property listed as Warning Lites of Illinois Inc. (aka, Forklift Exchange Inc) located east at 844 Kay Avenue, is identified on several environmental database. Specifically, the Forklift Exchange Inc. is identified on the UST, LUST, FINDS and small quantities Generator databases. Forklift Exchange Inc. had operated two 10,000-gal USTs (one diesel fuel; one gasoline) at 844 Kay Ave. Both USTs were removed in 1993. According to the IEPA database (IL EPAD ID: 0430055059, Incident number: 941645) it appears that remedial activities have occurred at the site, and in 1995 a No Further Remediation letter was granted for the LUST incident. Based on information provided by the

IEPA, it does not appear that any institutional controls or engineered barriers were used at the site as part of the closure agreement and therefore, at this time, no further action or investigation is recommended with respect to this nearby parcel.

No other adjacent properties that appear to pose a significant environmental threat to the Subject Property were identified.

#### **4.5.3 Surrounding Area Properties**

Although some of the surrounding area properties are listed on the environmental databases, based on information obtained during this evaluation, the thick gray clay geology (which inhibits the migration of contaminants) in the area, and the likely direction of groundwater flow, it does not appear that any of the surrounding area properties pose a significant environmental threat to the Subject Property.

## **5.0 CONCLUSIONS AND RECOMMENDATIONS**

Based on the available information reviewed, site reconnaissance and data collected for the Subject Property as noted herein, we present the following evaluation for the property located at 700 W. Belden Avenue in Addison, Illinois.

- The Subject Property was located within a light industrial area of West Dundee, Illinois. The Subject Property consisted of approximately 1.12 acres and was developed with single-story building encompassing 21,098 square feet. The Subject Property appeared to be in good condition, no evidence of significant spills and staining were noted on the facility. The rest of the property was finished with landscaping and asphalt paved parking areas.
- Historical information reviewed indicated that the Subject Property was used for agricultural purposes until the early 1970s, then for equipment storage before being developed in 1988 for commercial purposes. The current building was constructed in 2001.
- The Subject Property was identified on the ERNS environmental database for the dumping of oil into a sewer drain in 2002. Although it is generally poor disposal practice to dump any hazardous materials into the sewer system, the waste materials would have flowed directly into the system and not remained on the Subject Property.

K-Plus has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 for the Subject Property located at 700 W. Belden Ave. Any exceptions to or deletions from this practice are described in Section 6.0 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the Subject Property.

## **6.0 DEVIATIONS**

K-Plus has performed this Phase I ESA in conformance with the scope and limitations of ASTM Standard E 1527-05. This Report was prepared with the following limitations and exceptions:

1. No legal description was provided for this property. This data gap does not affect the ability of K-Plus to identify RECs at the property.
2. While the historical use of the property was identified in every decade from 1939 to present time, the historical use was not always identified in 5 year intervals as required by the ASTM standard. Historical record reviewed indicates that the Subject Property use and development is as described herein. This data gap does not affect the ability of K-Plus to identify RECs at the property.
3. A Freedom of Information Act request was made to the Addison Building Department. As of the date of this report, no response was received. This data gap does not affect the ability of K-Plus to identify RECs at the property.
4. The ASTM 1527-05 User Questionnaire was not completed. During the course of the site inspection, K-Plus was able to interview Ms. Kellie Grengs who provided answers to all questions appearing on the questionnaire. Ms. Grengs was unaware of any environmental concerns for the Subject Property. Therefore, this data gap does not affect the ability of K-Plus to identify RECs at the Subject Property.
5. K-Plus did not submit a FOIA request to the Illinois Environmental Protection Agency for LUST records for the Subject Property, based on time constraints and on data obtained from standard historical sources and the IEPA/LUST database.
6. K-Plus hereby affirms that the regulatory database searches for this Phase I ESA are subject to the limitations of Environmental Data Resources Inc. (EDR).
7. K-Plus was not provided with an environmental lien records search. However, a review of all standard environmental database searches did not reveal any evidence of environmental issues or liens for the Subject Property. In addition, site contacts were unaware of any environmental liens against the Subject Property.
8. No 50 year Chain-of-Title was provided by the client for evaluation. This data gap does not affect the ability of K-Plus to identify RECs at the property.
9. K-Plus did not conduct interviews of past owners, operators or occupants. K-Plus was able to interview the most recent tenant. This data gap does not affect the ability of K-Plus to identify RECs at the property.

***Phase I Environmental Site Assessment***

WiKUS Saw Technology, Corp.

700 W Belden Ave,

Addison, IL 60101

---

10. Access to the rooftop was not provided. Therefore, K-Plus makes no guarantees as to equipment, which may be present on the roof. However, K-Plus Engineering did not observe rooftop equipment of environmental significance as viewed from the ground.

## **7.0 ADDITIONAL SERVICES**

Per the request of the client, K-Plus Engineering evaluated the following non-scope considerations.

### **7.1 Asbestos**

As part of a standard Phase I Assessment and in accordance with the *Guidance for Controlling Asbestos-Containing Materials in Buildings*, issued by the U.S. Environmental Protection Agency (USEPA) in 1985, K-Plus Engineering concentrated on identifying suspect materials sprayed or troweled on ceilings and walls; insulation on pipes, boilers, and other mechanical equipment; and miscellaneous materials such as ceiling and floor tiles. Inaccessible areas (those locations where inspection access is not permitted or requires a considerable amount of mechanical or structural disassembly) were not evaluated during this Phase I ESA. Inaccessible areas include, but are not limited to, pipe chases behind solid walls and ceilings, the interiors of machinery and equipment, and the interior of the building's water sewer system, which may contain transite piping.

No suspected asbestos containing materials (ACMs) were noted at the Subject Property. ACMs do not appear to pose a business risk for the Subject Property.

### **7.2 Lead Paint**

K-Plus performed a limited lead-based paint search of accessible areas in the interior of any buildings. In order to determine the presence of lead-based paint on the Subject Property, K-Plus inspected all reasonably accessible painted surfaces (i.e. walls, ceilings, door frames, window sills, etc.) for potential lead-based paint

Painted surfaces are not considered suspect for lead based on the 2001 construction date of the Property. Further, no residential or daycare use is made of the Property. Therefore, lead-based paints are not considered a significant environmental concern.

### **7.3 Lead in Drinking Water**

Municipal drinking water was supplied to residential and commercial properties in Addison by the DuPage Water Commission via the City of Chicago Jardine Water Filtration Plant. According to the published 2011 Water Quality Report, the drinking water has met all USEPA and State drinking water standards. A copy of the 2011 report is found on the Village of Addison website.

### **7.4 Radon**

According to the USEPA Map of Radon Zones in Illinois (1993), DuPage County, the county in which the Subject Property lies, has been designated as Zone 2, which is deemed as having a moderate potential for radon. According to the Map, Zone 2 has a predicted average screening level

of 2 to 4 pCi/L. As a comparison, the USEPA recommends that the radon level be under a concentration of 4 pCi/L.

As the Subject Property is not currently being used for residential purposes, it is the opinion of K-Plus that radon is not currently an issue, and therefore no on-site radon testing was conducted.

## **7.5 Wetland & Flood Plain Review**

The Subject Property was located within a developed area of Addison, Illinois. No evidence of wetland resources were noted on the Subject Property. The area of the Subject Property was shown in a Zone X on FEMA map 17043C0307H dated December, 16, 2004. According to the map legend a zone X is “an area determined to be outside the 0.2% annual chance floodplain”.

## **7.6 Mold**

K-Plus did not observe any evidence of mold at the Subject Property, nor was there any evidence of water leaks or water damage that may lead to conditions in which mold thrives.

## **7.7 Vapor Encroachment Assessment**

The ASTM E2600 Vapor Encroachment Screen was completed by K-Plus. The screening was designed to assist parties seeking to meet the search requirements of the ASTM Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM E 2600-10). Based on a review of the adjacent properties listed below the sites do not represent a potential Vapor Encroachment for the subject property as the ground water gradient is away from the subject property and in general the shallow subsurface soil consists of low permeable silty clay which is not conductive for vapor migration.

- Warning Lites of Illinois Inc. ( AKS: Forklift Exchange Inc) located east at 844 Kay Avenue had operated two 10,000-gal USTs (one diesel fuel; one gasoline) at 844 Kay Ave. Both USTs have been removed 1993. According to the IEPA database (IL EPAD ID: 0430055059, Incident number: 941645) it appears that remedial activities have occurred at the site, and in 1995 the No Further Remediation letter was granted for the LUST incident. Based on the lack of a current open release, the closed former release and the low permeable local silty clay, the site was not considered a potential VE site for the subject property.

## **7.8 Other Non-Scope Considerations**

During this evaluation, K-Plus noted that there are high voltage power lines over 1000 feet north of the Subject Property. This distance mitigates concerns of any effect of Property operations. K-Plus did not identify any wetlands, or culturally or historically significant lands may affect property value or the health of the environment or its inhabitants.

## **8.0 REFERENCES**

1. Site Contact: K-Plus was accompanied during the site inspection my Ms. Kellie Grengs, Operations Manager for WiKUS Saw Technology at the site.
2. Aerial Photographs: An aerial photograph search was provided by Environmental Data Resources (EDR). Aerial photographs dated 1939, 1952, 1962, 1971, 1978, 1983, 1988, 1993, 1998, 1999, 2005, 2006 and 2007 were reviewed in conjunction with this investigation.
3. Sanborn Fire Insurance Maps: A Sanborn map search was conducted through Environmental Data Resources (EDR). No Sanborn maps were available for the Subject Property or surrounding area.
4. Topographic Maps: A topographic map from the United States Geological Survey 7.5 Minute Series, DuPage County, Addison, IL Quadrangle was reviewed for the year 2011.
5. Building Department Records: K-Plus submitted Freedom of Information Act (FOIA) requests to local agencies concerning any historical information regarding the Subject Property. As of the date of this report, responses have not been received.
6. Township Assessor Office: K-Plus consulted with the DuPage County Township Assessor's office to obtain current information regarding the building on the Subject Property,.
7. Storage Tank Search: K-Plus requested records regarding the presence of storage tanks from the Village of Addison. Additionally, K-Plus reviewed the Office of the Illinois State Fire Marshal (OSFM) database of registered USTs and the Illinois Environmental Protection Agency (IEPA) database of leaking UST (LUST) sites.
8. Environmental Database Report: K-Plus reviewed an environmental database radius map search report prepared by Environmental Data Resources (EDR) for the Subject Property and surrounding area.

## **9.0 CERTIFICATION**

The Phase I ESA was completed by Kashif Bazal, and was reviewed by Mr. Daniel M. Caplice, P.E. Professional profiles are provided in Appendix 8.

I declare that to the best of our professional knowledge and belief, I/we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. I/We have the specific qualifications based on education, training, and experience to assess the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Conformance with 40 CFR Part 312 was achieved through completion of the assessment in accordance with ASTM Standard Practice E 1527-05.

Kashif Bazal  
Senior Project Scientist

Daniel M. Caplice, P.E.

***Phase I Environmental Site Assessment***

WiKUS Saw Technology, Corp.

700 W Belden Ave,

Addison, IL 60101

---

**APPENDIX 1**

**PHASE I ENVIRONMENTAL SITE ASSESSMENT CONTENTS**

### ***Area Geology***

The potential for contaminating groundwater resources is a critical concern. Contamination may result from land burial of municipal wastes and surface or near-surface disposal of wastes (i.e. septic systems; surficial sludge; agricultural pesticides, herbicides and fertilizers; accidental spills of hazardous chemicals or petroleum products; etc.). When chemical or biological agents from wastes enter surface water or groundwater, they present potential health hazards. Groundwater aquifers are susceptible to contamination because their hydrogeologic properties provide a rapid transport pathway for migrating compounds. The degree of potential impact is determined by a combination of the geological and hydrological conditions in a given area.

### ***Property Inspection***

A visual inspection of the Subject Property was performed. The inspection consisted of a walk-through of the building and the surrounding grounds. During the walk-through of the building, an effort was made to look at all mechanical and common areas. During the inspection of the surrounding grounds, the inspector looked for stained or disturbed soil, signs of illegal or unauthorized dumping, and any improper or imprudent use, storage, and disposal of hazardous materials.

### ***Storage Tank Search***

The storage tank search is completed because studies have estimated that a quarter of the country's underground storage tanks (USTs) are leaking. While most leaks are small and don't present major environmental threats, larger leaks that result in groundwater contamination can require significant cleanup actions because several million of these USTs, as well as a large percentage of above ground storage tanks (ASTs) in the United States, contain petroleum or hazardous chemicals.

### ***PCB Equipment Identification***

Due to their physical and chemical properties, PCBs were widely used as a dielectric fluid in electrical transformers and capacitors. In addition to electrical equipment, PCBs were also widely used in hydraulic fluids and some lubricating oils. Although the primary concern with PCB contamination is from large electrical and mechanical equipment in heavily industrialized areas, small quantities of PCBs may also be present in any older equipment utilizing dielectric fluid or hydraulic oils.

In 1976, Congress enacted TSCA (Toxic Substance Control Act), which specifically regulates PCBs. In a 1986 USEPA report, it was estimated that, out of all the transformers currently in operation across the country, approximately 77,000 contain PCBs. Of these 77,000 transformers, about 18,000 are owned by utility companies with the remainder belonging to building owners.

### ***Environmental Database Evaluation Area***

K-Plus conducted a limited visual inspection of all adjoining properties in order to identify any RECs or other potential environmental issues that may pose a threat to the Subject Property. In addition, and as required by the ASTM Standard, regulatory databases, and when available, regulatory files, were reviewed during this assessment to determine whether the Subject Property

has been the subject of any environmental regulatory agency or order. Because the migration of chemicals is not limited to property lines, neighboring properties can in some cases impact the Property. For this reason, nearby properties were also evaluated to determine if any of these have had a history of environmental problems.

All sites located within the ASTM standard radius distances from the Subject Property are evaluated as part of the ESA. Any sites that are considered to be a potential environmental concern based on their operations, regulatory history, or proximity to the Subject Property are investigated more extensively. If a detailed discussion of a property listed in one of the environmental databases is not provided here, it is because K-Plus has determined, based on research and observations, that the property does not pose a significant environmental risk to the property being addressed in the Phase I Environmental Assessment.

### ***Asbestos***

Asbestos-Containing Material (ACM) gained widespread use because of its availability and unique properties as reinforcement material and an insulator. As a result, asbestos was commonly used in many building materials such as vinyl floor tile and mastic, ceiling tile, thermal insulation, and wall board. Eventually, however, medical research determined that prolonged exposure to asbestos was a potential cause of cancer and other lung diseases. Asbestos products manufacturing in the U.S. was banned under the Toxic Substances Control Act (TSCA) beginning in 1990.

### ***Lead Paint***

According to the National Lead Information Center, any residential structure built before 1978 may contain lead-based paint. Further, most residential buildings constructed prior to 1960 contain lead-based paint; and these older structures generally contain paint that contains higher concentrations of lead than paints manufactured in later years.

Lead is a heavy, gray metal that was historically added to house paints and other paints because it helped them dry faster. Lead-based paint was also preferred because it made a coating that stood up to wear and tear and weathering. Today lead is classified as a toxic substance and is known to cause adverse health effects in humans and the environment. In 1978 lead-based paint for residential use was banned by the Consumer Products Safety Commission. In the residential housing sector, the U.S. Department of Housing and Urban Development (HUD) estimates that there are about 57 million privately owned and occupied residential dwellings built before 1980 that contain lead-based paint. If in good condition and when left intact, lead-based paint by itself is not likely to present a hazard. However, deteriorating paint, particularly in residential situations, may pose a significant public health risk.

### ***Radon***

According to the United States Environmental Protection Agency Office of Radiation and Indoor Air, nearly 1 out of every 15 homes in the U.S. is estimated to have elevated radon levels. Radon is

a gas that results from the natural breakdown (radioactive decay) of uranium, and can be found in soils and rocks containing uranium, granite, shale, phosphate, and pitchblende. In addition, radon can be present in certain types of industrial wastes including byproducts from uranium or phosphate mining. In outdoor conditions, radon is diluted to very minor concentrations; however, inside of an enclosed space such as a basement, radon can accumulate causing adverse health affects including an increased risk of developing lung cancer.

In order to evaluate the risk of radon at a property, K-Plus first reviewed all applicable Federal and State radon studies. Specifically, for properties in Illinois, K-Plus reviewed a statewide radon screening conducted in 1990 by the Illinois Department of Nuclear Safety. K-Plus then considered the property use (i.e. residential, commercial, industrial, etc.) and the presence of any useable enclosed spaces (i.e. residential basements) to further determine the extent of risk. In instances where a property was considered a potential risk for radon, K-Plus conducted an on-site radon screening test.

### ***Mold***

K-Plus performed a limited mold search of accessible areas in the interior of any buildings. Often mold can negatively affect the health of the environment or humans and can go undetected in between wall spaces or dropped ceilings.

### ***Vapor Intrusion***

Vapor Intrusion is the migration of volatile chemicals from the subsurface into overlying buildings. Volatile chemicals in buried wastes and/or contaminated groundwater can emit vapors that may migrate through subsurface soils and into indoor air spaces of overlying buildings in ways similar to that of radon gas seeping into homes. Through any breaks in the foundation, such as for sump pumps, drains, or cracks, soil vapors can enter properties. Soil vapors accumulate over time in your building and can lead to indoor air pollution, which can have an affect on your health or the health of your employees.

The purpose of a vapor intrusion assessment is to identify, to the extent feasible, the potential for vapor intrusion conditions (pVIC) or vapor intrusion conditions (VIC). For this Phase I ESA, only the first tier of the evaluation process will be used to determine whether a pVIC exists.

### ***Other Non-Scope Considerations***

Other non-scope considerations such as the presence of high voltage power lines, wetlands, or culturally or historically significant lands may affect property value or the health of the environment or its inhabitants.

**APPENDIX 2**

**GLOSSARY OF TERMS**

ENVIRONMENTAL SERVICES

## GLOSSARY OF TERMS

**ACM** – Asbestos Containing Material

**ACBM** – Asbestos Containing Building Material

**Adjoining or adjacent property** – any real property or properties the border of which is contiguous or partially contiguous with that of the *Subject Property*, or that would be contiguous or partially contiguous with that of the *Subject Property* but for a street, road or other public thoroughfare separating them.

**Aerial photograph** – photographs taken from an airplane or helicopter of areas encompassing the property. Aerial photographs are often taken for government agencies or private collections unique to a local area.

**All appropriate inquiry (AAI)** – that inquiry into the previous ownership and uses of the *Subject Property* consistent with good commercial or customary practice.

**APEC** – area of potential environmental concern.

**ASTM** – American Society of Testing Materials or ASTM International

**AST** – Aboveground Storage Tank

**BGS** – Below Ground Surface

**BTEX** – Benzene, Toluene, Ethylbenzene and Xylene

**Building department records** – those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property. Often building department records are located in the building department of a municipality or county.

**Business environmental risk** – a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a Subject Property, not necessarily limited to those environmental issues required to be investigated by ASTM. Business environmental risks may involve addressing one or more non-scope considerations.

**CERCLIS** – *Comprehensive Environmental Response, Compensation and Liability Information System* the list of sites compiled by EPA that have investigated or are currently investigating for potential hazardous substance contamination for possible inclusion on the National Priorities List.

**Construction debris** – concrete, brick, asphalt and other such building material discarded in the construction of a building or other improvement to a property.

ENVIRONMENTAL SERVICES

## GLOSSARY OF TERMS

*Contaminant source* – the origin of the soil and groundwater contamination; may be a general property location (for example, a dry cleaner property address) or, if known, a specific location on a property (for example, the dumpster behind the dry cleaners where filters with perchloroethylene dry cleaning solvent were disposed).

*Data gap* – a lack of or inability to obtain information required by this practice despite good faith efforts by the *environmental professional* to gather such information. *Data gaps* may result from incompleteness in any of the activities required by *ASTM*, including but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory official, etc.).

*Demolition debris* – concrete, brick, asphalt and other such building material discarded in the construction of a building or other improvement to a property.

*DNAPL* – Dense non-aqueous phase liquids

*Drum* – a container (typically, but not necessarily holding 55 gallons (208 L) of liquid) that may be used to store hazardous substance or petroleum products.

*Dry well* – underground areas where soil has been removed and replaced with pea gravel, coarse sand, or large rocks. Dry wells are used for drainage, to control storm runoff, for the collection of spilled liquids (intentional and non-intentional) and wastewater disposal (often illegal).

*Due diligence* – the process of inquiring into the environmental characteristics of a parcel of commercial real estate or other conditions, usually in connection with a commercial real estate transaction. The degree and kind of due diligence vary for different properties and differing purposes.

*Dwelling* – structure or portion thereof used for residential habitation.

*EDR* – Environmental Data Resources Inc., the supplier of the environmental radius map report.

*Environmental professional* – a person meeting the education, training, and experience requirements as set forth in *ASTM Practice E 1527*.

*Environmental Site Assessment (ESA)* – the process by which a person or entity seeks to determine if a particular parcel of real property (including improvements) is subject to recognized environmental conditions. At the option of the user, an environmental site assessment may include more inquiry than that constituting appropriate inquiry or, if the user is not concerned about qualifying for the innocent landowner defense, less inquiry than that constituting appropriate inquiry.

ENVIRONMENTAL SERVICES

## GLOSSARY OF TERMS

*Fill dirt* – dirt, soil, sand or other earth, that is obtained off-site that is used to fill holes or depressions, create mounds, or otherwise artificially change the grade or elevation of real property. It does not include material that is used in limited quantities for normal landscaping activities.

*Fire insurance maps* – or *Sanborn maps* are maps produced for private fire insurance map companies that indicate uses of properties at specific dates and that encompass the property. These maps are often available at local libraries, historical societies, and private resellers or from the map companies who produced them.

*FOIA* – Freedom of Information Act request

*GPR* – Ground penetrating radar

*Groundwater* – the water contained in the pore spaces of saturated geologic media.

*Hazardous materials/ substances* – any solid, liquid or gas which is toxic, flammable, caustic, reactive/explosive, and/or radioactive.

*Hazardous waste* – a solid waste or combination of solid wastes, which because of its quantity, concentration or physical, chemical or infectious characteristics may (A) cause or significantly contribute to an increase in mortality or and increase in serious irreversible or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported or disposed of, or otherwise managed.

*IEPA* – Illinois Environmental Protection Agency

*Landfill* – a place, location, tract of land, area, or premises used for the disposal of solid wastes as defined by state solid waste regulations. The term is synonymous with the term solid waste disposal site and is also known as a garbage dump, trash dump, or similar term.

*Local government agencies* – those agencies of municipal or county government having jurisdiction over the property. Municipal and county government agencies include but are not limited to cities, parishes, townships, and similar entities.

*Local street directories* – directories published by private (or sometimes government) sources that show ownership, occupancy, and use of sites and/or by reference to street addresses. Often local street directories are available at libraries or local governments, colleges or universities, or historical societies.

*Leaking Underground Storage Tank (LUST) sites* – state lists of leaking underground storage tank sites. Section 9003 (h) of Subtitle I of RCRA gives EPA and states, under cooperative agreements with EPA, authority to clean up releases from UST systems or require owners and operators to do so.

ENVIRONMENTAL SERVICES

## GLOSSARY OF TERMS

*Material safety data sheets (MSDS)* – written or printed material concerning a hazardous substance which is prepared by chemical manufacturer's, importers, and employers for hazardous chemicals pursuant to OSHA's Hazard Communication Standard.

*National Priorities List (NPL)* – list compiled by EPA pursuant to CERCLA 42 USC § 9605(a)(8)(B) of properties with the highest priority for cleanup pursuant to EPA's hazard ranking system.

*Non Scope factors* -- ...Environmental issues or conditions at a property that parties may wish to assess in connection with commercial real estate that are outside the scope of this [ASTM] practice.

*Occupants* – those tenants, subtenants, or other persons or entities using the property or a portion of the property.

*Orphaned site* – EDR uses the term “orphaned site” to reference a site that, due to incomplete geographic location data, are not plotted on the EDR radius maps.

*Owner* – generally the fee owner of record of the property.

*Petroleum products* – petroleum, including crude oil distillates of crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance; natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas). Including but not limited to gasoline, kerosene, diesel oil, jet fuels, and fuel oil.

*Pits, ponds or lagoons* – man-made or natural depressions in a ground surface that are likely to hold liquids or sludge containing *hazardous substances* or *petroleum products*. The likelihood of such liquids or sludge being present is determined by evidence of factors associated with the *pit, pond or lagoon*, including, but not limited to discolored water, distressed vegetation, or the presence of an obvious wastewater discharge.

*Polychlorinated Biphenyl (PCB)* – environmental contaminant commonly found in power transformers.

*Polynucleic/Polycyclic Aromatic Hydrocarbon (PNA/PAH)* – environmental contaminant commonly found in highly industrialized areas, or in areas that experienced a fire.

*Property* – the real property that is the subjects of the environmental site assessment described in this practice. Real property includes buildings and other fixtures and improvements located on the property and affixed to the land.

ENVIRONMENTAL SERVICES

## GLOSSARY OF TERMS

*Publicly available* – information that the source of the information allows access to the information by anyone upon request.

*Potable water* – water that is or can be used for consumption

*Practically reviewable* – information is provided by the source in a manner and in a form that, upon examination, yields information relevant to the property without the need for extraordinary analysis or irrelevant data. The form of the information shall be such that the user can review the records for a limited geographic area. Records that cannot be feasibly retrieved by reference to the location of the property or a geographic area in which the property is located are not generally *practically reviewable*.

*Preferential pathway* – the pathway that has the least amount of constraint on the migration of chemicals of concern.

*REC* -- As defined in ASTM E 1527-05, the term *Recognized Environmental Condition* means "...the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property." In addition, the term *Historical Recognized Environmental Condition* means ". . . an environmental condition which in the past would have been an REC, but which may or may not be considered a REC currently." Performance of the Phase I ESA was intended to reduce, but not eliminate, uncertainty regarding the existence of Recognized Environmental Conditions in connection with the Subject Property.

*Site visit* – the visit to the property during which observations are made constituting the site reconnaissance section of the Phase I Environmental Site Assessment in Practice E 1527 and the site visit requirements of the transaction screen process in this practice.

*Solvent* – a chemical compound that is capable of dissolving another substance and is itself a hazardous substance used in a number of manufacturing/industrial processes including, but not limited to, the manufacture of paints and coatings for industrial and household purposes, equipment clean-up, and surface degreasing in metal fabricating industries.

*Subject Property* – The building or parcel on which the Phase I Environmental Site Assessment is the focus.

*Sump* – a pit, cistern, cesspool, or similar receptacle where liquids drain, collect or are stored.

*USEPA* – United States Environmental Protection Agency

## GLOSSARY OF TERMS

*Underground Storage Tank (UST)* – any tank, including underground piping connected to the tank, that is or has been used to contain *hazardous substances* or *petroleum products* and the volume of which is 10% or more beneath the surface of the ground.

*User* – the party seeking to use the transaction screen process of this practice or the Phase I Environmental Site Assessment of Practice E 1527 to perform an environmental assessment of the property, a potential tenant of property, an owner of property, a lender, or a property manager.

*USGS 7.5 Minute Topographic Map* – the map (if any) available from or produced by the United States Geological Survey, entitled “USGS 7.5 Minute Topographic Map,” and showing the property.

*Volatile organic compound (VOC)* – a general term for an organic compound that has a high enough vapor pressure at standard temperatures and pressure to significantly vaporize and enter the atmosphere.

*Waste water* – water that is or has been used in an industrial or manufacturing process, conveys or has conveyed sewage, or is directly related to manufacturing, processing, or raw materials storage areas at an industrial plant. Wastewater does not include water originating on or passing through or adjacent to a site, such as stormwater flows, that has not been used in industrial or manufacturing, processing, or raw materials storage areas at an industrial plant.

*Zoning/land use records* – those records of the local government in which the property is located indicating the uses permitted by the local government in particular zones within its jurisdiction. The records may consist of maps and/or written records. They are often located in the planning department of a municipality or county.

## The EDR Aerial Photo Decade Package

# EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.**

***Thank you for your business.***

Please contact EDR at 1-800-352-0050  
with any questions or comments.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

700 W. BELDEN AVENUE  
ADDISON, IL 60101

#### COORDINATES

Latitude (North): 41.9109000 - 41° 54' 39.24"  
Longitude (West): 88.0026000 - 88° 0' 9.36"  
Universal Tranverse Mercator: Zone 16  
UTM X (Meters): 416848.6  
UTM Y (Meters): 4640156.0  
Elevation: 710 ft. above sea level

### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

#### ***EDR Proprietary Records***

Manufactured Gas Plants.....	EDR Proprietary Manufactured Gas Plants
EDR Historical Auto Stations.....	EDR Proprietary Historic Gas Stations
EDR Historical Cleaners.....	EDR Proprietary Historic Dry Cleaners

### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### **STANDARD ENVIRONMENTAL RECORDS**

#### ***Federal CERCLIS/NFRAP site List***

## EXECUTIVE SUMMARY

**CERC-NFRAP:** Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 12/28/2011 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>HERITAGE INK CO</b>	<b>310 GERRI LN</b>	<b>ESE 1/4 - 1/2 (0.368 mi.)</b>	<b>58</b>	<b>98</b>

### ***Federal RCRA CORRACTS facilities list***

**CORRACTS:** CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 08/19/2011 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### ***Federal RCRA generators list***

**RCRA-SQG:** RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/11/2012 has revealed that there are 14 RCRA-SQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 09/11/2012 has revealed that there are 10 RCRA-CESQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### ADDITIONAL ENVIRONMENTAL RECORDS

#### ***Other Ascertainable Records***

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 09/11/2012 has revealed that there are 8 RCRA-NonGen sites within approximately 0.25 miles of the target property.

<b>Equal/Higher Elevation</b>	<b>Address</b>	<b>Direction / Distance</b>	<b>Map ID</b>	<b>Page</b>

## EDR Site Report™

# TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases. The report is divided into three sections:

**Section 1: Facility Summary .....** **Page 3**

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

**Section 2: Facility Detail Reports .....** **Page 4**

All available detailed information from databases where sites are identified.

**Section 3: Databases and Update Information.....** **Page 7**

Name, source, update dates, contact phone number and description of each of the databases for this report.

***Thank you for your business.***  
Please contact EDR at 1-800-352-0050  
with any questions or comments.

## SECTION 1: FACILITY SUMMARY

FACILITY	FACILITY 1
<b>AREA</b>	700 WEST BELDEN ADDISON, IL 60601 EDR ID #2002597038
<b>WASTE MANAGEMENT</b> Facility generates hazardous waste (RCRA)	NO
Facility treats, stores, or disposes of hazardous waste on-site (RCRA/TSDF)	NO
Facility has received Notices of Violations (RCRA/VIOL)	NO
Facility has been subject to RCRA administrative actions (RAATS)	NO
Facility has been subject to corrective actions (CORRACTS)	NO
Facility handles PCBs (PADS)	NO
Facility uses radioactive materials (MLTS)	NO
Facility manages registered aboveground storage tanks (AST)	NO
Facility manages registered underground storage tanks (UST)	NO
Facility has reported leaking underground storage tank incidents (LUST)	NO
Facility has reported emergency releases to the soil (ERNS)	YES - p4
Facility has reported hazardous material incidents to DOT (HMIRS)	NO
<b>WASTE DISPOSAL</b> Facility is a Superfund Site (NPL)	NO
Facility has a known or suspect abandoned, inactive or uncontrolled hazardous waste site (CERCLIS)	NO
Facility has a reported Superfund Lien on it (LIENS)	NO
Facility is listed as a state hazardous waste site (SHWS)	NO
Facility has disposed of solid waste on-site (SWF/LF)	NO
<b>MULTIMEDIA</b> Facility uses toxic chemicals and has notified EPA under SARA Title III, Section 313 (TRIS)	NO
Facility produces pesticides and has notified EPA under Section 7 of FIFRA (SSTS)	NO
Facility manufactures or imports toxic chemicals on the TSCA list (TSCA)	NO
Facility has inspections under FIFRA, TSCA or EPCRA (FTTS)	NO
Facility is listed in EPA's index system (FINDS)	NO
Facility is listed in a county/local unique database (LOCAL)	NO
<b>POTENTIAL SUPERFUND LIABILITY</b> Facility has a list of potentially responsible parties PRP	NO
<b>TOTAL (YES)</b>	1

## SECTION 3: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

**Elapsed ASTM days:** Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

### DATABASES FOUND IN THIS REPORT

#### **ERNS: Emergency Response Notification System**

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 04/02/2012

Database Release Frequency: Annually

Date of Last EDR Contact: 10/02/2012

Environmental Interest/Information System

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

**Environmental Interest/Information System**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003  
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDs CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDs CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005  
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDs CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (CIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (CIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

HAZARDOUS WASTE BIENNIAL REPORTER

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018  
Waste name: BENZENE

Waste code: D039  
Waste name: TETRACHLOROETHYLENE

Violation Status: No violations found

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil transporter: No

Historical Generators:

Date form received by agency: 10/21/1985  
Facility name: MONROE CARTAGE INC  
Classification: Conditionally Exempt Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FUDS Description Details:

The 123.15-acre Nike Site C-72 property is located in Addison, Illinois. In April 1974, the entire installation, except for the 5.01 acres composing the housing area, was reported excess to GSA. A portion of the control area consisting of fee title to 0.57 of an acre and 0.26 of utility easements was transferred to

the Federal Aviation Administration (FAA). This parcel was later exceded and sold to UPS on 2 September 1979. The remainder of the control acres was reported excess to GSA on 13 October 1976. GSA transferred the site to the Department of Interior, Heritage Conservation and Recreation Service, which conveyed this parcel to the Addison Park District. The housing area consisting of 5.01 acres of land is still owned and controlled by the U.S. Army.

**FUDS History Details:**

The installation, acquired between 1954 and 1957, was used exclusively by the Army from 1955 to 1974. Pertinent construction occurred during this period of Army occupation.

**FUDS Current Program Details:**

**FUDS Future Program Details:**

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### *Federal NPL site list*

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/07/2012	Source: EPA
Date Data Arrived at EDR: 07/05/2012	Telephone: N/A
Date Made Active in Reports: 09/18/2012	Last EDR Contact: 10/11/2012
Number of Days to Update: 75	Next Scheduled EDR Contact: 01/21/2013
	Data Release Frequency: Quarterly

EPA Region 10	
Telephone 206-553-8665	

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date Data Arrived at EDR: 07/05/2012	Telephone: N/A
Date Made Active in Reports: 09/18/2012	Last EDR Contact: 10/11/2012
Number of Days to Update: 75	Next Scheduled EDR Contact: 01/21/2013
	Data Release Frequency: Quarterly

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

### **DELISTED NPL: National Priority List Deletions**

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/07/2012	Source: EPA
Date Data Arrived at EDR: 07/05/2012	Telephone: N/A
Date Made Active in Reports: 09/18/2012	Last EDR Contact: 10/11/2012

	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

### **CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System**

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/27/2011	Source: EPA
Date Data Arrived at EDR: 02/27/2012	Telephone: 703-412-9810
Date Made Active in Reports: 03/12/2012	Last EDR Contact: 11/28/2012
Number of Days to Update: 14	Next Scheduled EDR Contact: 03/11/2013
	Data Release Frequency: Quarterly

### **FEDERAL FACILITY: Federal Facility Site Information listing**

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/11/2011	Telephone: 703-603-8704
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 10/09/2012
Number of Days to Update: 36	Next Scheduled EDR Contact: 01/21/2013
	Data Release Frequency: Varies

## ***Federal CERCLIS NFRAP site List***

### **CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned**

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/28/2011	Source: EPA
Date Data Arrived at EDR: 02/27/2012	Telephone: 703-412-9810

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/11/2012

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2012  
Date Data Arrived at EDR: 10/04/2012

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal institutional controls / engineering controls registries***

### **US ENG CONTROLS: Engineering Controls Sites List**

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 07/18/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/24/2012	Telephone: 703-603-0695
Date Made Active in Reports: 11/05/2012	Last EDR Contact: 12/10/2012
Number of Days to Update: 104	Next Scheduled EDR Contact: 03/25/2013
	Data Release Frequency: Varies

### **US INST CONTROL: Sites with Institutional Controls**

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 07/18/2012	Source: Environmental Protection Agency

## LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

Date of Government Version: 01/01/1990  
Date Data Arrived at EDR: 06/17/2009  
Date Made Active in Reports: 07/15/2009

Data Release Frequency: Semi-Annually

LUST TRUST: Underground Storage Tank Fund Payment Priority List

In case sufficient funds are not available in the Underground Storage Tank Fund, requests for payment are entered on the Payment Priority List by "queue date" order. As required by the Environmental Protection Act, the queue date is the date that a complete request for partial or final payment was received by the Agency. The queue date is "officially" confirmed at the end of the payment review process when a Final Decision Letter is sent to the site owner.

Data Release Frequency: Varies

## ADDITIONAL ENVIRONMENTAL RECORDS

### *Local Brownfield lists*

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 10/24/2012      Source: Environmental Protection Agency

## **Other Ascertainable Records**

### **RCRA-NonGen: RCRA - Non Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/11/2012  
Date Data Arrived at EDR: 10/04/2012  
Date Made Active in Reports: 12/04/2012

Last EDR Contact: 12/11/2012  
Next Scheduled EDR Contact: 03/25/2013  
Data Release Frequency: Annually

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 09/14/2010

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## UIC: Underground Injection Wells

Injection wells are used for disposal of fluids by "injection" into the subsurface. The construction of injection wells range from very technical designs with twenty-four hour monitoring to simply a hole dug in the ground to control runoff. As a result of this diversity, the UIC Program divides injection wells into five different classes.

Date of Government Version: 08/31/2012

Data Release Frequency: Varies

## HWAR: Hazard Waste Annual Report

Each year, Illinois hazardous-waste generators tell the Illinois EPA the amounts and kinds of hazardous waste they produced during the previous year. Generators indicate by code the types of wastes produced and the steps they took to manage these wastes. If some or all of these wastes were sent to commercial treatment, storage, and disposal facilities (TSDFs), that information and the identity of each receiving facility also are submitted. Illinois TSDFs likewise report the types and quantities of wastes received from in-state and out-of-state generators; they also report the procedures they used to manage these wastes.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 11/11/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/18/2012	Telephone: 703-308-4044

## EDR PROPRIETARY RECORDS

### *EDR Proprietary Records*

#### Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EDR Historical Auto Stations: EDR Proprietary Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/20/2012	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 08/20/2012	Telephone: 860-424-3375
Date Made Active in Reports: 09/20/2012	Last EDR Contact: 11/19/2012

Data Release Frequency: Annually

**Oil/Gas Pipelines:** This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

## Electric Power Transmission Line Data

Source: Rextag Strategies Corp.  
Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## Nursing Homes

Source: National Institutes of Health  
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

## Public Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

## Private Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Longitude (West):	88.0026 - 88° 0' 9.36"
Universal Tranverse Mercator:	Zone 16
UTM X (Meters):	416848.6
UTM Y (Meters):	4640156.0
Elevation:	710 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	41088-H1 LOMBARD, IL
Most Recent Revision:	1998
East Map:	41087-H8 ELMHURST, IL
Most Recent Revision:	1997

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

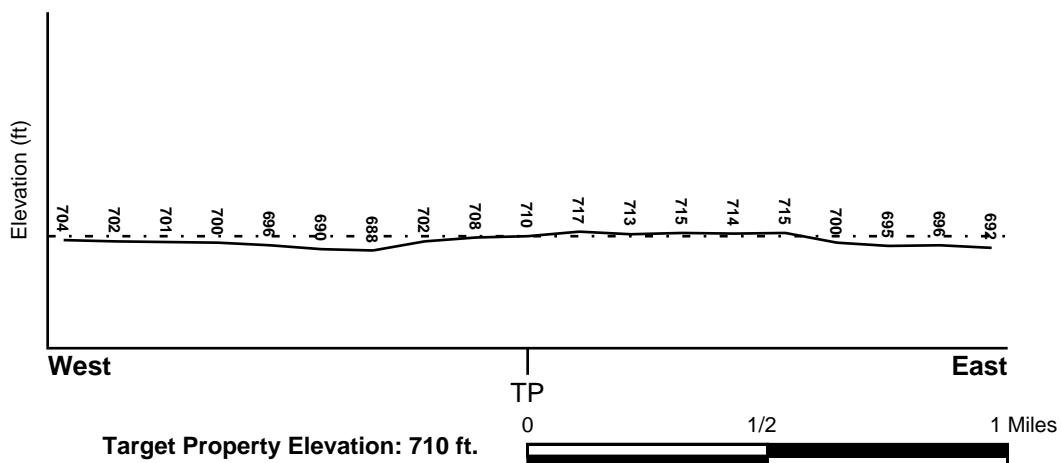

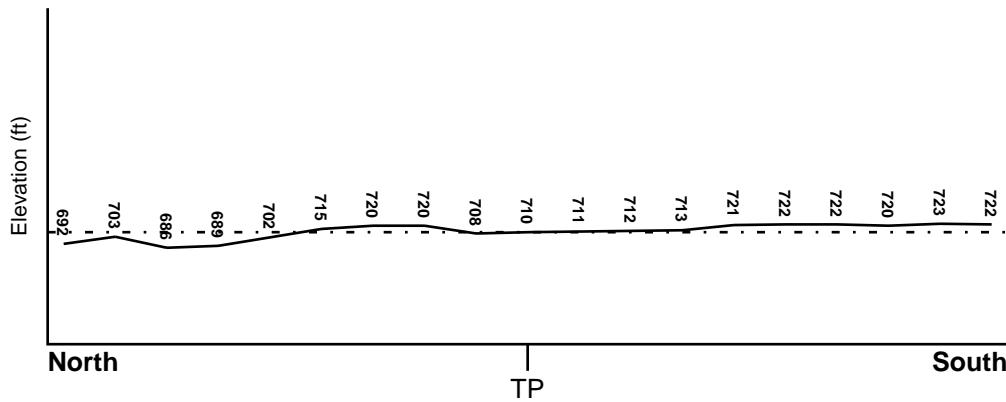

### TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### **TARGET PROPERTY TOPOGRAPHY**

General Topographic Gradient: General SW

#### **SURROUNDING TOPOGRAPHY: ELEVATION PROFILES**

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### **HYDROLOGIC INFORMATION**

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### **FEMA FLOOD ZONE**

<u>Target Property County</u> DUPAGE, IL	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	1701980007C - FEMA Q3 Flood data
Additional Panels in search area:	1701980004C - FEMA Q3 Flood data 1701980005C - FEMA Q3 Flood data 1701970030D - FEMA Q3 Flood data 1701980008B - FEMA Q3 Flood data 1702120005B - FEMA Q3 Flood data 1702170001B - FEMA Q3 Flood data

### **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u> LOMBARD	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	---

### **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### ***Site-Specific Hydrogeological Data\*:***

Search Radius: 1.25 miles  
Status: Not found

### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### ROCK STRATIGRAPHIC UNIT

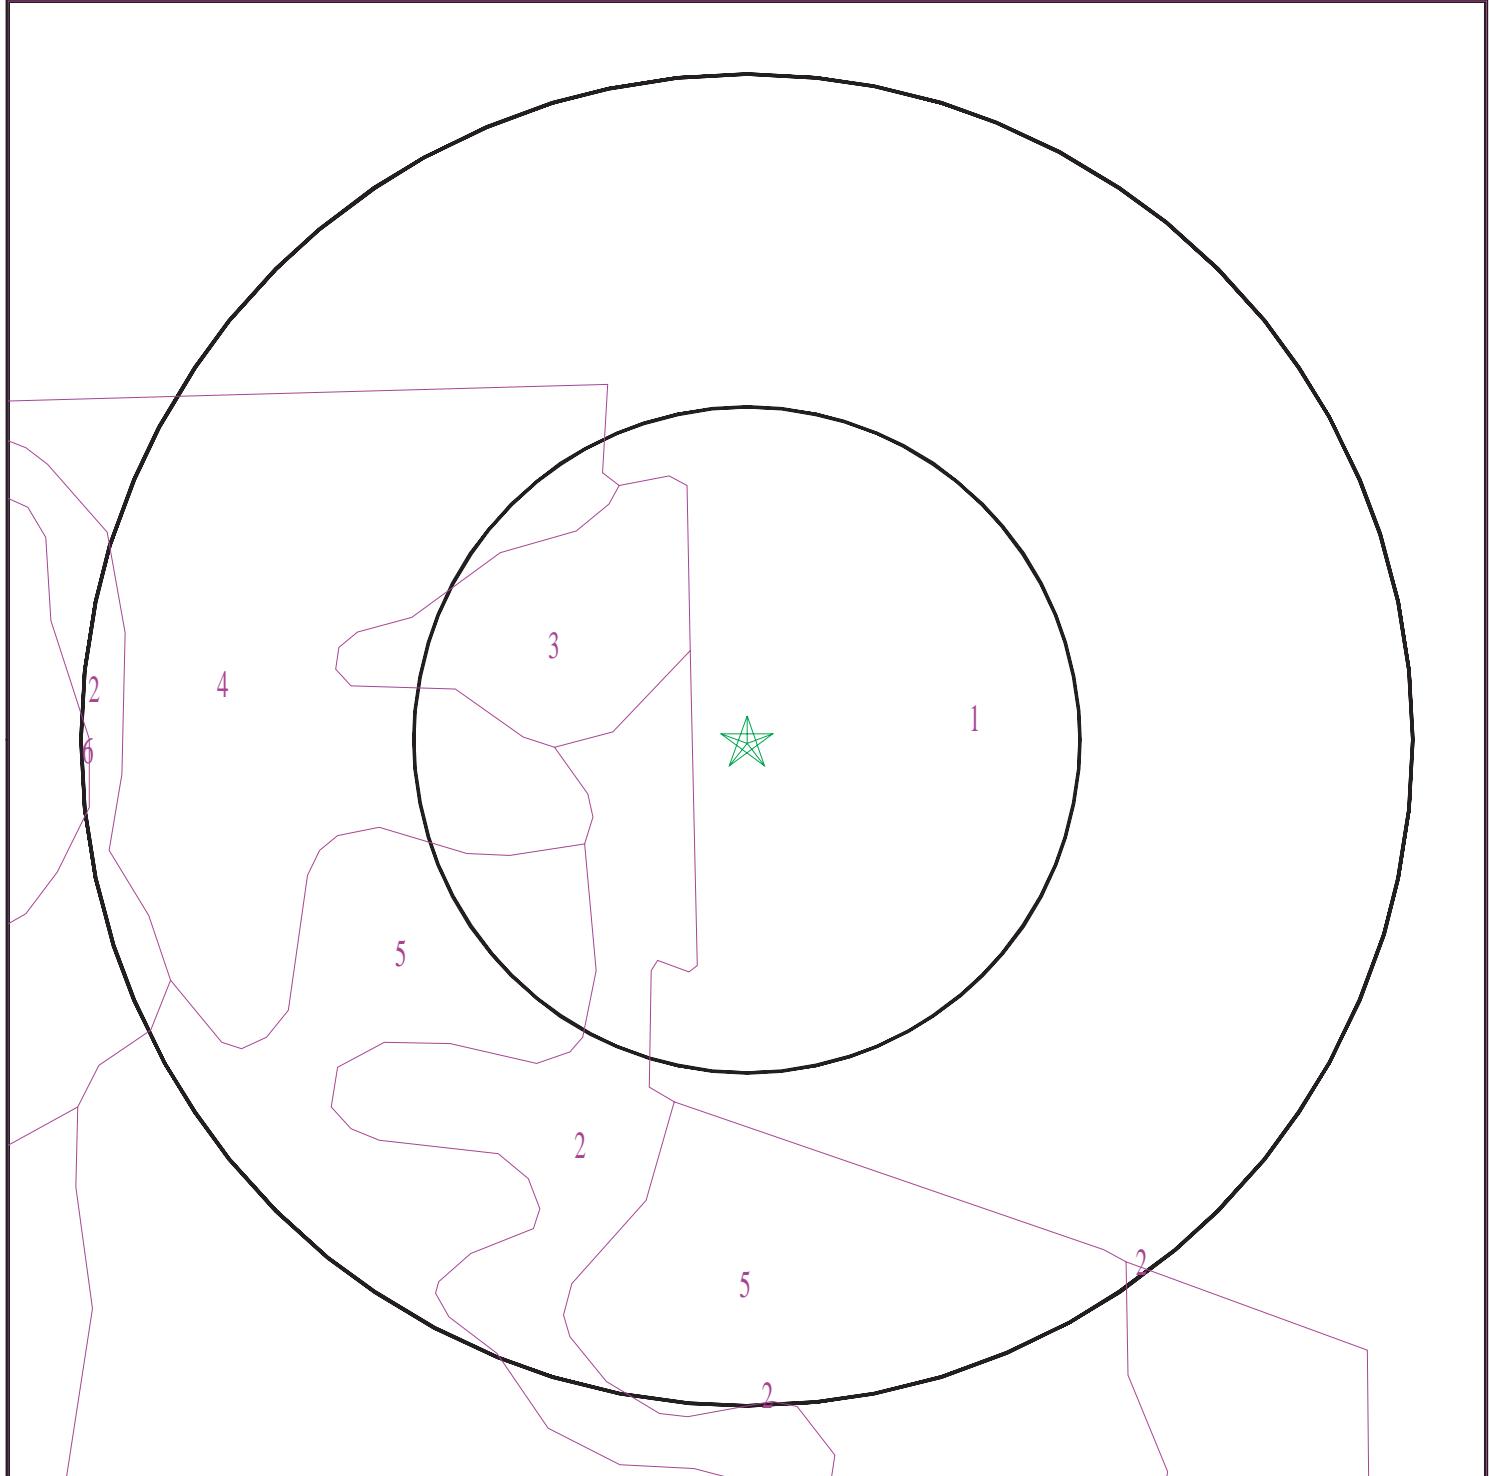

Era: Paleozoic  
System: Silurian  
Series: Middle Silurian (Niagoaran)

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

#### Soil Map ID: 1

Soil Component Name: Orthents, clayey

Soil Surface Texture: silty clay

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 84 inches

Soil Layer Information								
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil			
1	0 inches	5 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.14	Max: 8.4 Min: 6.1	
2	5 inches	59 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.14	Max: 8.4 Min: 6.1	

#### Soil Map ID: 2

Soil Component Name: Ashkum

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Poorly drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

Soil Layer Information								
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)	
	Upper	Lower		AASHTO Group	Unified Soil			
1	53 inches	59 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 7.8 Min: 6.6	
2	0 inches	11 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 7.8 Min: 6.6	
3	11 inches	29 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 7.8 Min: 6.6	
4	29 inches	53 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4.23 Min: 1.41	Max: 7.8 Min: 6.6	

### Soil Map ID: 3

Soil Component Name: Peotone

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Very poorly drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

Soil Layer Information								
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)	
	Upper	Lower		AASHTO Group	Unified Soil

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

### WELL SEARCH DISTANCE INFORMATION

<u>DATABASE</u>	<u>SEARCH DISTANCE (miles)</u>
Federal USGS	1.000
Federal FRDS PWS	Nearest PWS within 1 mile
State Database	1.000

### FEDERAL USGS WELL INFORMATION

MAP ID	WELL ID	LOCATION FROM TP
M57	USGS2351590	1/2 - 1 Mile NE
O63	USGS2351584	1/2 - 1 Mile South

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### FEDERAL USGS WELL INFORMATION

MAP ID	WELL ID	LOCATION FROM TP
P69	USGS2382970	1/2 - 1 Mile NW
99	USGS2351579	1/2 - 1 Mile SE

### FEDERAL FRDS PUBLIC WATER SUPPLY SYSTEM INFORMATION

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## **SUMMARY OF EXPERIENCE**

Mr. Bazal has over 6 years of extensive experience as a project manager working with REA Environmental and Bazal Properties. As a project manager, Mr. Bazal, has managed projects nationwide of over 300 Phase I Environmental Site Assessments. Mr. Bazal has managed and acquired the following:

- Responsible for ensuring district compliance with Federal, State, and Local regulations related to hazardous materials.
- Projects performed for governmental agencies, private property owners, non-profit organizations, lending institutions, schools/universities, hotels and others.
- Updating and delivering employee training programs related to hazardous materials and waste.
- Supervising work of outside contractors involved in removing or testing hazardous materials.
- Keeping informed of current and proposed regulations related to program areas assigned.
- Performing related fieldwork as required. Including sampling hazardous and/or industrial waste and bulk sampling of material suspected of containing lead or asbestos.
- Maintaining operation and inspection logs (O&M's).
- Submitting clear and concise written reports based on field inspections.
- Recommending and coordinating the development of programs needed to comply with hazardous materials regulations. Analysis and litigation support for petroleum hydrocarbon contaminated and UST sites.

Providing coordination with regulatory agencies; concerning hazardous materials.

**Education:**

*MM, Finance and Managerial Economics, J.L. Kellogg Graduate School of Management, Northwestern University*

*MPH, Industrial Hygiene and Safety Engineering, University of Illinois at Chicago*

*BS, Civil Engineering, University of Illinois, Urbana, IL*

**Licenses/Certifications:**

*Professional Engineer: IL, IN, IA, FL, KY, LA, MI, MN, MO, NC, OH, PA, SC, TX, and WI,*

*AHERA Building Inspector: IL and IN*

*LUST Site Assessor: WI and IN*

*OSHA 40 Hour HazMat Training*

*OSHA 8-hour On-site Management & Supervisor Training*

*HM-126F Safe HazMat Transportation Training*

*Radon Detection Services*

*Corrective Actions for Ground Water Contamination*

## DANIEL M. CAPLICE

Mr. Caplice is a licensed professional engineer in multiple states with 30 years of engineering and consulting experience. He has an in-depth understanding of local, state and federal regulations and has performed projects in accordance with CERCLA, RCRA, CWA/Oil Pollution Act, CAA, TSCA, and FIFRA requirements. His specialized areas of expertise are evaluation of contaminated properties, assessment of risk and endangerment, regulatory compliance and permitting, hazardous waste management, industrial processes, Brownfield development, and site management including investigation, remediation, construction management, and monitoring.

Currently, a Partner at K-Plus Engineering, a 20 year-old, full service, engineering and consulting company with offices in Illinois, Indiana, Wisconsin, North Carolina, and California. At K-Plus, Mr. Caplice is responsible for managing and directing the company in addition to his ongoing work as an expert in environmental matters.

For the past 25 years, he has served as a consulting environmental expert for numerous private, public, and non-profit institutions. His responsibilities have included designing and directing various projects, particularly voluntary cleanups of contaminated soil and ground water sites, underground storage tank remediations, and NPL evaluations, investigations, and cleanups. Mr. Caplice has worked extensively on the investigation and cleanup of numerous active and abandoned industrial facilities, landfills, and other waste sites. He has also served as the project manager or senior technical advisor on hundreds of Phase I and Phase II Environmental Assessments at a multitude of sites, from small, undeveloped parcels of property to multi-location industrial facilities. Finally, Mr. Caplice has served as a technical expert on numerous State and Federal cases pertaining to the investigation and cleanup of contaminated properties as well as industrial hygiene and safety related issues pertaining to the investigation and remediation of contaminated property.

Mr. Caplice also has experience in the regulatory analysis of projects for compliance with federal and state environmental regulations, guidance, protocols, and procedures. His environmental regulatory experience includes evaluating compliance of private party actions, reviewing and preparing comments on proposed environmental laws and administrative rules, reviewing site documents and preparing detailed comments, and serving as a technical expert in various environmental cases. Mr. Caplice is also regular speaker at environmental conferences and seminars.

Prior to joining K-Plus, Mr. Caplice served in several capacities for the USEPA, Region 5, including Manager of a Superfund unit responsible for sites in Illinois and Indiana, and Manager of the Pre-Remedial Unit that was responsible for the investigation and assessment of abandoned waste sites (CERCLIS sites) for possible inclusion on the Superfund National Priorities List. While at the USEPA, he also regularly represented the Agency at the International Joint Commission on Water Quality in the Great Lakes.
